

# CPRE Advanced

The Advanced Level addresses the holders of the CPRE Foundation Level certificate, who want to deepen their knowledge of particular Requirements Engineering and Business Analysis activities. The Foundation certificate is a prerequisite for an Advanced Level exam.

## Requirements Elicitation and Consolidation (E&C)

Techniques from the Foundation Level are elaborated. Participants will appropriate further techniques to efficiently elicit and consolidate requirements.

## Requirements Management

Appropriate methods and techniques to effectively deal with the management of requirements throughout the product development.

## Requirements Modeling

Correct use of graphical models to express functional requirements.

## RE@Agile

Applying RE methods and techniques in agile development processes.
